Spelling pg 48 Writing Words in Cursive	Spelling pg 49 Writing Words in Cursive	SP. Pg 50 Practice Writing Words in Cursive	Spelling pg 51 Practice Writing Words in Cursive	Spelling Test

Study Strategies & Tips:

Rewrite your notes on lined paper/index cards or type them on the computer. Draw pictures after each item of information (bullet).

Rewrite your notes in COLOR using colored pencils.

Draw pictures next to each bullet on your study guide. The crazier your picture, the more likely you are to remember the information. Add color to the pictures you drew.

Have someone read the notes to you as you read the notes silently to yourself.

Use mnemonics to help you remember specific information. For example, to remember the Great Lakes, remember the word HOMES. HOMES = Huron, Ontario, Michigan, Erie, and Superior

Try singing the information to yourself and add body movements/dance as you review the information. The more you tie your senses into studying, the more likely you are to remember the information.

Remember - During a study period (15 minutes is reasonable), your brain remembers the most during the first few minutes and last few minutes of your study time. After you have studied 15 minutes for a test, take a five minute break. When you start again, start studying in a different place than before.

In Class...

.....Come to class every day prepared with materials requested by your teacher

.....Pay attention in class!

.....Participate in class! Ask questions when you are unsure of something.

.....Write all your assignments in your planner each day! Check off each assignment when you have completed it. You are provided with time to do this and you are responsible for this without being asked!

.....Always complete your homework with quality of thought and on time. Use your textbook to help you discover answers to questions/problems.
